# PLAN YOUR VAN OUTFIT

## INSIDE ROOF HEIGHT

To determine the maximum shelf height that can be used in the van.

## PARTITION DEPTH

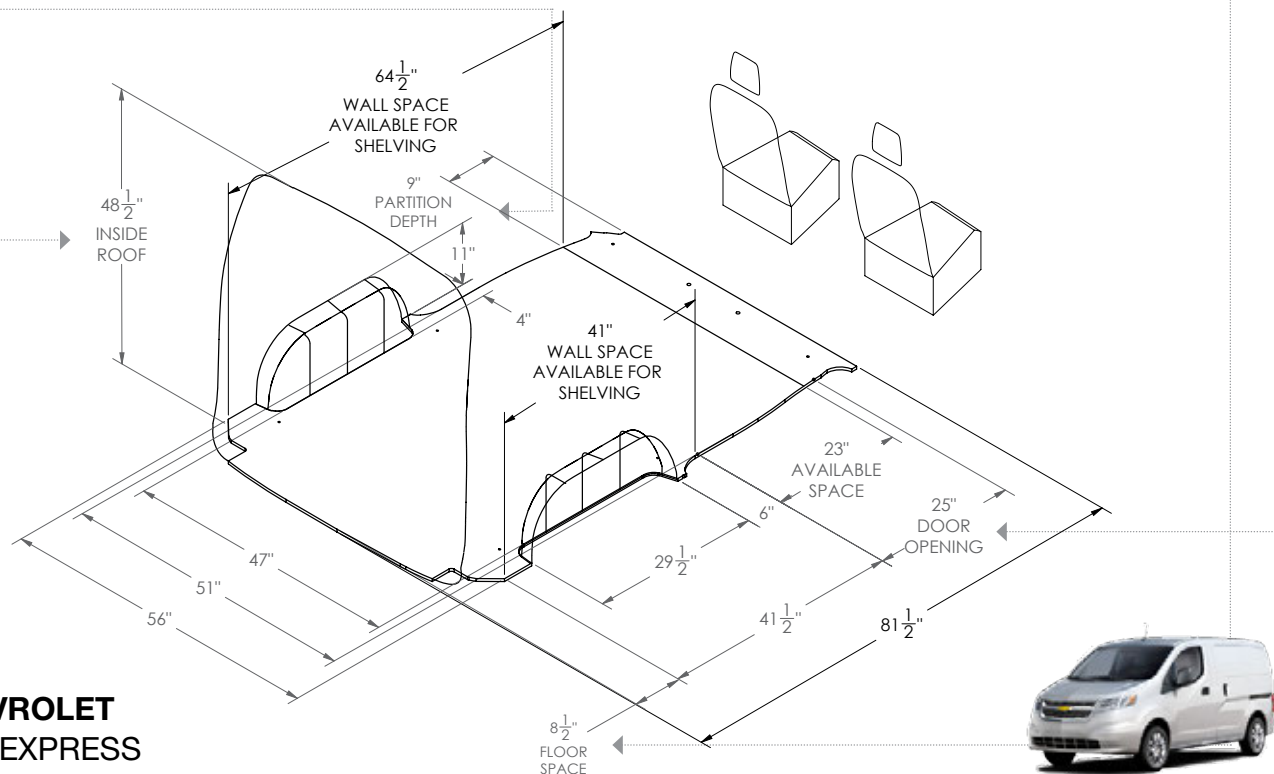

This indicates the space taken up by our partition for this vehicle. Please note that this measurement is determined by the partition that encroaches the most. Some partitions may take up less space. Take note that this measurement may not necessarily be on the floor.

## DOOR OPENING

To determine where shelving will land in relation to the door opening. Use this measurement to determine the space available for drawer units.

## FLOOR SPACE

This area is usable floor space but due to curvature of the van there may not be the same available area at the roof. Please measure actual van for specific measurement at roof.

# SAFETY PARTITIONS

Impact tested safety partitions protect the most important asset: you

Ranger Design safety partitions provide a solid and secure barrier between the occupants of the van and the cargo.

Built from heavy gauge steel and aluminum, they are designed for maximum impact resistance and uphold a standard of safety set only by Ranger products.

Ranger Design partitions also provide a more comfortable environment for the driver by giving more seat travel and by not rattling as the vehicle drives down the road.

## SAFE

Designed for maximum impact resistance.  
Proven by impact testing.

## EFFICIENT

1. Contoured to maintain seat travel and ensure driver comfort. 2. Contoured to capitalize on cargo area floor space.

## QUIET

Thickness of material cancels vibrations.
